Plastic Separator Sheets

A sustainable, cost effective, multiple return method for transporting bulk containers.

Plastic Separator Sheets also called Tier, Layer, and Divider sheets, offer an efficient technique for transport of empty cans, containers, and bottles to fillers in the food and beverage industries.

Plastic Separator Sheets are far more hygienic than cardboard or fiberboard sheets and offer rigidity, memory, and flexibility characteristics which allows for the sheet to regain a smooth, clean, flat surface which is desired for an expanded life and multiple repack turns.

**Performance**
- Multiple repack returns
- Extremely durable
- Surface Memory
- Rigid
- Flexible

**Sanitary**
- Eliminates foreign matter contamination
- Washable
- Moisture, bacteria, fungus, resistant
- Repels insect, larvae, rodents, etc.
- FDA approved

**Product Cost**
- Rapid return on investment
- Eliminate cardboard disposal fees
- Rental programs
- Buy-back programs

**Environmental Responsibility**
- Reusable
- 100% recyclable
- Eliminates cardboard waste

Custom manufacturing available utilizing FDA approved resins, size variations, and colors. Fresh Pak is a global leader in the manufacturing of sustainable material handling products with fully integrated operational capabilities.
