

Plastic Slip Sheets

A sustainable, cost saving replacement for pallets

Eco-Sheets Plastic Slip Sheets are designed for pallet-less material handling and provide solutions that improve the economic and environmental sustainability of transporting products throughout the supply chain.

Eco-Sheets are being used worldwide to ship a growing number of products such as: Food and Beverage, Electronics, Chemicals, and Agriculture.

Performance

- High Tensile Strength (Pull Resistance)
- High Co-efficient of Friction (Non Slip Surface)
- One way or Multiple use
- Repels Insect, Larvae, Rodent, etc.
- Hygienic and Maintenance Free

Product Cost

- Rapid return on investment
- Eliminate cardboard disposal fees
- Rental programs
- Buy-back programs

Warehouse & Transportation

- 25% Truck / Container Cube Optimization
- 25% Reduction in Transportation
- Reduces Packaging Weight 1:32 (2/lb. Slip Sheet vs. 65/lb. Pallet)
- Warehouse Optimization 1:80 (500 Slip Sheets vs. 500 Pallets Per Cube Meter)

Sustainability

- Made with 90% Recycled Plastic
- 100% Recyclable
- Eliminates wood disposal and deforestation

Custom manufacturing available utilizing different resin types, size variations, and colors. Fresh Pak is a global leader in the manufacturing of **sustainable** material handling products with fully integrated operational capabilities.
